DURABLE FINISH

Hansa chipper housings are made of solid 5mm & 10mm steel. All surfaces are media blasted prior to powder-coating for complete adhesion.

SELF-FEEDING

The chute is designed with the user in mind. It includes a large opening (no pre-cutting necessary!) and is angled at a comfortable operating height to make the most of its self-feeding action.

SHARP CUTS

The cutting knives shear the material against an adjustable hardened anvil with a scissor like action.

EASY ACCESS

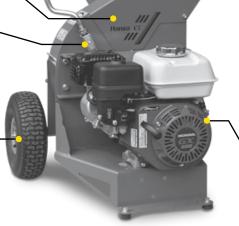

Blockages are rare, but should you need to clear the housing or access knives for servicing the chipper is designed to open up easily & safely.

SOFT START

Easy starting with soft start technology - wind down handle to engage the belt drive between engine and rotor for smooth running and protection of your engine against shock loads.

DIRECT DISCHARGE

Draught action rotor allows mulch to discharge directly from outlet. Collect in a optional bag, discharge direct to ground or for high-outlet models straight into trailer or stockpile.

MANOEUVRABLE

Well-balanced design with built-in handles, pneumatic wheels, low center of gravity and optional tow-bars makes our chippers a breeze to move around.

LIFESTYLE

QUALITY ENGINES

Genuine Honda NZ approved engines used on our petrol powered chippers.

Application

Suburban

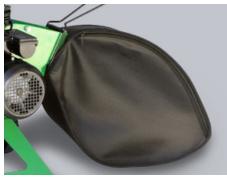

C4

C3e / C4 bag

This solid, light weight chipper will handle all the demands of the domestic garden – including fibrous materials. Easy starting, feed through a single inlet chute and discharge out the side with bag option will keep your property shipshape.

Application

Specifications

Option

The Hansa C5 is a no-nonsense chipper built with simplicity in mind. Sporting the compactness and light weight features of the C4, coupled with a heavier flywheel, higher outlet chute and horsepower the C7 exhibits. The C5 is the big-brother of the Garden range, with optimised selffeeding action to chew through branches with ease.

Application

Specifications

The ultimate weapon when it comes to efficiently maintaining your lifestyle block. Pre-cutting isn't necessary as branches simply flow through the large inlet chute. The momentum within the cantilevered cutting disk creates a strong draft to discharge high onto a stock pile or trailer.

Bumper

Hansforming landscapes... one chipper at a time

Established in the 1980's, Hansa Products are specialists in the design and manufacture of high quality chipping and shredding equipment. We have been around long enough to say we know chippers - we've built and sold over 41,000 chippers after all - but innovation is not about just repeating what we know, but staying open-minded. That's why our focus is not to make the same chippers every day - but relentlessly sharpening each design.

We are always looking for new ways to create a better chipping experience. Our goal is to produce products that help you to 'hansform' your landscape like us – and work faster, better and safer than ever before.

Hansa heritage

Founded by Manfred, the next generation of Hansforming is led by son Martin, inheriting his fathers ingenuity. Growing up alongside Hansa, Martin developed a passion for Engineering. And after following his father's footsteps to complete an engineering degree, he officially joined Hansa in 2002, but has been involved in Hansa since day one.

Dependable for a lifetime

Whether it's a hired machine, a personal purchase or a business investment, we believe in providing the best chipping experience. That's why our chippers come with a 3 year warranty on registration, and we have developed ongoing service and support systems to keep you chipping for a lifetime. As a testament to the pride that our customers feel for their chippers, we've met many long-time users who love their 'Hansa' and heard many great success stories over the years.

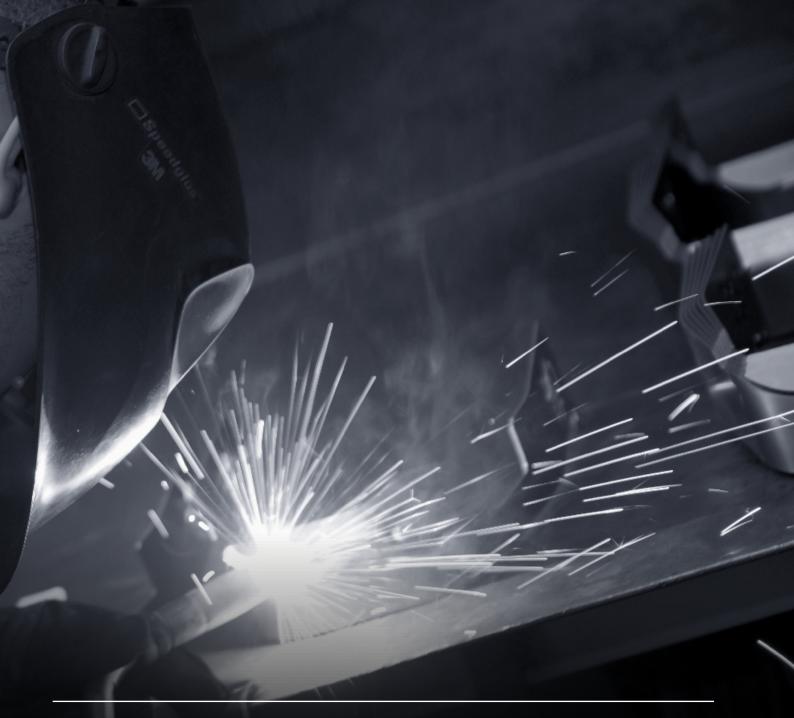

Such is the workmanship and quality of our machines that we can still find working units of early model chippers that were made by Hansa 42 years ago.

Making a difference

As the second-generation owner and director, Martin has seen Hansa's growth first-hand and found that many of Hansa's best innovations came from listening to customers. That's why at Hansa we make a point to ensure that everyone in the Hansa family - including staff and customers - makes a difference. To this day, the design team works to involve customer feedback into every Hansa design.

Pride in your work

As proud as we are about the chippers we produce, we know they need to earn their keep while they're in your hands. So, whether you're tending your own gardens, working as a landscaper, a professional arborist or other commercial user, our chippers are all designed to make tough work enjoyable. It's not just about getting the job done, but the experience of doing it well, and doing it better – using less time, less people, and having less down-time. Our customers are people like us, people who take pride in their work and have an appreciation for a job done well.

Sharper production

As we are specialists in chippers, we know we must offer a superior product to ensure we remain competitive to mass machine manufacturers. That's why all our machines are of our own design. Developed over time from first-hand experience in the field.

We use the latest manufacturing technologies in our engineering and production including:

- Solidworks 3D Design
- CNC machining
- Laser-cutting
- CNC folding
- Robot welding
- And in-house powder-coating facilities

Our dedication to production quality helps us stand apart from others and produce unmatched durability of finish.

Sustainable ambition

We are an ambitious bunch, who want to see Hansa grow, but believe in doing it sustainably. As much as our customers enjoy our chippers, the long product lifespan means we can't rely on re-purchases only. Rather than reducing product quality, Hansa's sustainable growth approach means growing our exports so that more people can enjoy owning the very best chippers that we can make – without compromise.

We also believe in environmental sustainability. Our chippers are built to be as efficient as possible, using less fuel, top quality motors and finished with a non-toxic surface. While there will always be people that prefer to chop and burn every tree in their way, most of our customers also choose to re-use their woodchip to enrich their environment. Whether it's composting, weed suppressing, moisture retention or volume reduction, mulch is used as a viable alternative to reduce carbon from transportation or burning for a socially responsible approach that adds value back into the landscape.

Bottom Safety Bar

C45

The powerful hydraulic feed system of this diesel powered chipper makes it easy to process any material. Its wide feed opening pulls bushy and twisted branches with forks into the machine without effort. Activate the feed roller with the control bar and the rest is taken care of by the

electronic automatic sensor feed system.

Application

Option Feature

Safety Bar

C65

Widely considered to be the best in its class, this powerful, lightweight, manoeuvrable hydraulic feed chipper boasts extraordinary capacity to weight ratio. This feature is accentuated by its wide feed opening - often described as a 'small in size but big in capacity' chipper, all achieved through clever design and manufacturing.

Hydraulic Winch

Lift & Crush

Bottom Safety Bar

When the job takes you to difficult sites, over rough terrain, narrow access or soft ground conditions, you need a machine that's up to the challenge. The rubber track drive is operated by a fully proportional remote control removing the operator from the danger zone. Track the C65rx to site or use it as a trailed machine on the custom built T20 trailer. When used on the trailer, the inlet chute is at the same height as the towable C65 so you can maximise the return from your tracked investment.
